

CAT DNA HEALTH SCREEN & LIFE PLAN

The Orivet Cat DNA Health Screen & Life Plan helps you discover specific health related risks and traits buried in your cat's DNA. Understanding your cat's health risks and ancestry can assist you and your Veterinarian in creating an effective and personalized training, wellness, nutrition and medical program for your cat.

The Orivet Cat DNA Health Screen & Life Plan allows you to:

- Screen your pet's DNA for dozens of genetic diseases and traits
- Learn about potential health risks based on hyper pets breed, age, gender, and weight
- Potential health risks are further classified based on likelihood & impact
- Determine your cat's blood group
- Develop a personalized health and wellness plan
- To obtain and schedule alerts and schedule appointments
- Improve communication with your veterinarian and other pet care providers.
