

DOG DNA HEALTH SCREEN & LIFE PLAN

The Orivet Dog DNA Health Screen & Life Plan helps you discover specific health related risks and traits buried in your dog's DNA. Understanding your dog's health risks and ancestry can assist you and your Veterinarian in creating an effective and personalized training, wellness, nutrition and medical program for your dog.

The Orivet Dog DNA Health Screen & Life Plan allows you to:

- Screen your pet's DNA for dozens of genetic diseases and traits
- Learn about potential health risks based on hyper pets breed, age, gender, and weight
- Potential health risks are further classified based on likelihood & impact
- Identify tendencies towards adverse reactions to certain drugs
- Develop a personalized health and wellness plan
- Adult weight prediction
- Improve communication with your veterinarian and other pet care providers.
