

DNA Tests Features

BREED IDENTIFICATION DNA TEST

The Orivet Breed Identification DNA Test helps you discover the secrets buried in your dog's DNA. Understanding your dog's ancestry can assist you and your Veterinarian in creating an effective and personalised training, wellness, nutrition and medical program for your dog.

The Orivet Breed Identification DNA Test allows you to:

- Determine the breeds that make up your dog
- Gain insights into your dog's personality and behaviour
- Discover genetic health secrets
- Develop a personalised health and wellness plan
- Screen hereditary diseases relevant to the breeds that make up your dog (upgrade option)
- Adult weight prediction

MIXED-BREED IDENTIFICATION DNA TEST & LIFE PLAN

TAP TAG

The Orivet Tap Tag is the ultimate way to protect your pet and compliment their microchip. It is the most advanced smart pet identification tag. Simply Tap or scan QR code to receive instant notifications with your pet's location.

Key Features:

- Fully waterproof
- Never fades
- Strong alloy metal-protection
- No hidden activation fees
- No monthly or yearly subscriptions
- No batteries to charge
- No personal details on pet tag
- Update your pet information anytime
- Emergency medical information
- Safe & secure cloud server
- 24/7 global GPS location enabled
- Online resource allows you to receive alerts, plan medication reminders and interface with all of your pet care providers in one location

Our tags are wear-resistant and waterproof, each state-of-the-art NFC chip is covered by premium-grade PVC layers on either side and is reinforced by a tough zinc alloy metal frame. The outer multi-layered waterproof epoxy material is providing the tags with the ultimate durability and protection.

www.orivet.com

The greater your knowledge is about your dog's past, the smarter you can be about their future. Dogs - like people - inherit physical and personality traits from breeds in their family tree. They also pass along breed-specific genetic disorders from generation to generation.
